WORK EXPERIENCE

Homigo (Irvine, CA) June 2026 - Present

Full Stack Developer

- Led the end-to-end implementation of full-stack features for a startup marketplace-service platform across consumer, provider, and admin workflows using Next.js, TypeScript, Node.js, REST APIs, PostgreSQL/Supabase, and Stripe
- Built, improved and maintained core platform systems including job posting and bidding, provider onboarding and verification, payments and payouts, notifications, service-area matching, admin tools, reviews, and responsive UI improvements.

Koios Marketplace (Calabasas, CA) September 2025 - March 2026

Full Stack Developer

- Implemented end-to-end full-stack features for a startup e-commerce platform across vendor and consumer experiences, social media features, responsive UI/UX improvements, and routing/API integrations within a microservice architecture using React, TypeScript, Node.js, REST APIs, and PostgreSQL in an Agile environment.
- Led frontend development initiatives including vendor dashboard pages (financial analytics, listing details, projected performance), profile page structure, and moodboard public and edit viewings; stepped in as acting team lead when needed and conducted regular code reviews to ensure consistency and quality.

PROJECTS

Candid Locations May 2026

- Developed a cloud-backed full-stack web application for photographers to share photos and the real-world locations where they were taken, helping other users discover and save photography spots.
- Integrated Clerk authentication, AWS S3 photo storage, PostgreSQL/Drizzle data modeling, Google Places location lookup, and OpenAI vision-based insights for photo analysis.

Hybrid DeblurNet Image Restoration Pipeline July 2025

- Designed and trained a 7 M-parameter two-scale U-Net with Reformer attention and PatchGAN fine-tuning that restores a sharp frame from 7-frame synthetic bursts via a progressive-resolution curriculum and multi-objective SSIM + edge-L1 + LPIPS loss per burst.
- Achieved a validation LPIPS of ~0.052, SSIM of ~0.99, and L1 loss of ~0.021, and added per-term logging that cut composite loss by 25 %.

InterMeet - Android App May 2024

- Built an Android matching app in Kotlin connecting users based on shared interests, featuring swipe-based discovery, real-time chat, and profile management.
- Served as Product Manager and UX/UI Lead for a 5-person senior capstone team, defining product requirements, designing user flows and wireframes in Figma, and coordinating development through the full project lifecycle..

SKILLS

- **Languages:** C/C++, C#, Java, Python, HTML/CSS, JavaScript, TypeScript, SQL, NoSQL, Transact-SQL
- **Technologies:** Visual Studio Code, GitHub, Git, npm, Yarn, CI/CD Pipelines, Android Studio, Docker, Amazon Web Services(AWS), Supabase, Sharetribe API, Google Cloud API, OpenAI API, OpenAI Codex, Claude Coworker, Postman, Figma, Microsoft Excel, PowerBI, Confluence, Jira, Clerk, Bitbucket, Stripe
- **Frameworks/Libraries:** React.js, Vue.js, Jest, Node.js, Vite, Express.js, .NET/ASP.NET Core, FastAPI, REST API, GraphQL, Hono, TanStack Query, Tailwind CSS, Drizzle ORM, Zod, MapLibre, NumPy, matplotlib, pandas, scikit-learn, Keras, Tensorflow, shadcn/ui
- **Database:** PostgreSQL, MongoDB, Firebase Firestore, Microsoft SQL Server, Cloudflare D1

EDUCATION

California State University, Long Beach (CSULB) August 2020 - May 2024

Bachelor of Science in Computer Science

- GPA: 3.538
- Organization: CSULB Association for Computing Machinery (ACM)
- **Courses: Discrete Structures 1-2, Algorithms, Object Oriented Programming, Data Structures, Database Fundamentals, Advanced C++, Mobile Application Development, Machine Learning, Artificial Intelligence**
